

Why this theme?

We at HASS passionately strive towards improving your overall student experience and creating inclusive spaces for your growth and development. However, the last year onwards, we as a faculty and student community have been faced with challenges unthinkable in the previous years. The Covid pandemic engulfed us all and it was particularly impactful on the incoming students in 2020. As an inclusive faculty, we feel it is our duty and responsibility to ensure that those students, as well as new students in 2021, do not feel astray and get an opportunity to be fully involved in the University experience. Therefore, the theme of this year's Leadership competition is "Improving the 1st and/or 2nd year student experience". Through this competition, we invite students to design and implement a project that can materialise into 1st and 2nd year students gaining valuable experience in this climate of uncertainty and helping the student community make memories they missed out on in 2020.
